SUPPLEMENTARY INFORMATION:

In accordance with § 51.118 of title 10 of the *Code of Federal Regulations*, the NRC is making available final Supplement 55 to the GEIS regarding the renewal of Exelon operating licenses NPF-72 and NPF-77 for an additional 20 years of operation for Braidwood. Draft

Supplement 55 to the GEIS was noticed by the NRC in the *Federal Register* on March 25, 2015 (80 FR 15827), and noticed by the Environmental Protection Agency on March 27, 2015 (80 FR 16384). The public comment period on draft Supplement 55 to the GEIS ended on May 12, 2015, and the comments received are addressed in final Supplement 55 to the GEIS. Final Supplement 55 to the GEIS is available as indicated in the ADDRESSES section of this document.

As discussed in Chapter 5 of the final Supplement 55 to the GEIS, the NRC determined that the adverse environmental impacts of license renewal for Braidwood are not so great that preserving the option of license renewal for energy-planning decision makers would be unreasonable. This recommendation is based on: 1) the analysis and findings in the GEIS; 2) information provided in the environmental report and other documents submitted by Exelon; 3) consultation with Federal, State, local, and Tribal agencies; 4) the NRC staff's independent environmental review; and 5) consideration of public comments received during the scoping process and on the draft Supplement 55 to the GEIS.

Dated at Rockville, Maryland, this 13 day of November 2015.

For the Nuclear Regulatory Commission.

James G. Danna,
Chief,
Projects Branch 2,
Division of License Renewal,
Office of Nuclear Reactor Regulation.
